Defects/Uncompleted Tasks	Description
Task 3.4	listing.php doesn't have validation. If I remove one item from goods.xml the item number may collide due to generating the item_id based only on the length of the goods.xml file
Task 4.1	little to no input validation
Task 4.5	remove button removes the items but it goes into the negatives
Task 4.6	no cancel/or confirm buttons currently only works with only 1 user
